Play at the heart  
of learning

# Program Overview

Program: Thursday June 8<sup>th</sup>

## Evening Program

4:00 – 6:00 pm | **Advance Registration** (optional: CRX 1<sup>st</sup> floor)

Program: Friday June 9<sup>th</sup>

## Day Program

8:00 – 8:50 am	<b>Registration &amp; Light Breakfast</b> (CRX 1 <sup>st</sup> floor)
9:00 – 10:00 am	<b>Conference Opening</b> (CRX Auditorium)
10:00 – 11:00 am	<b>Playgroups</b> (CRX 4 <sup>th</sup> floor, EdStuDiO & Tinkering Lab)
11:00 – 11:15 am	<b>Break</b>
11:15 – 12:15 pm	<b>PlayJouer Workshops: Choose Your Own Adventure</b> (CRX 3 <sup>rd</sup> floor, EdStuDiO & Outside)
12:15 – 1:15 pm	<b>Lunch to go</b> (CRX 1 <sup>st</sup> floor)
1:15 – 2:15 pm	<b>Projects Showcase (1)</b> (CRX 2 <sup>nd</sup> floor & EdStuDiO) School teams share their learning through play projects (BC ; SK ; ON schools)
2:15 – 2:30 pm	<b>Break</b>
2:30 – 3:30 pm	<b>PlayJouer Workshops: Choose Your Own Adventure</b> (CRX 3 <sup>rd</sup> floor & Outside/C020)
2:30 – 3:30 pm	<b>Make it Stick: Network sustainability for school and system leaders</b> (CRX 2 <sup>nd</sup> floor) Andy Hargreaves & Trista Hollweck
3:30 pm	<b>Free Time</b> (to get ready for evening events)

## Evening Program

4:40 pm	<b>Transportation: Shuttle from Residences to Science &amp; Tech Museum</b>
5:30 pm	<b>Reception</b>
6:00 pm	<b>Learning Through Play: Ideas &amp; Provocation</b> <ul style="list-style-type: none"> <li>• Andy Hargreaves (CPSN – English)</li> <li>• Phyllis Dalley (RCÉL – French)</li> </ul>
6:30 – 9:00 pm	<b>Eat, Mingle &amp; Play</b> <ul style="list-style-type: none"> <li>• Food stations</li> <li>• Live demo</li> <li>• Mini workshops</li> <li>• Planetarium</li> <li>• UnMuseum Tour (scavenger hunt style)</li> <li>• Make your own swag station!</li> </ul>
9:00 – 10:00 pm	<b>Network &amp; Groove</b>
10:00 – 10:30 pm	<b>Transportation: Shuttle from Science &amp; Tech Museum to Residences</b>

## Make it Stick: Network sustainability for school and system leaders

Location : Tinkering Lab CRX 220 (2:30-3:30 PM)

How do we make all that the CPSN stands for sustainable together? Once good practices have been initiated, how can they spread and last between and beyond our own schools? This is the challenge of sustainability. This presentation reviews key principles of sustainability and how they apply to CPSN and to networks in general, as we all strive to move to the next level together.

### About Andy Hargreaves & Trista Hollweck

*Andy Hargreaves* is Visiting Professor at the University of Ottawa. Andy has helped to create and sustain eight different educational networks in Canada, the UK, the US, and Australia. He holds three honorary doctorates and has 8 Outstanding Writing Awards. The ideas in his most recent books – *Five Paths of Student Engagement* (2021) and *Well-being in Schools* (2022) are at the heart of this project.

*Trista Hollweck* is a Research Fellow at the University of Ottawa. The perfect blend of research, policy and practice, Trista is a former teacher, vice-principal and school district consultant and has designed and led educational networks at the school, province and international levels. Trista is a passionate advocate for innovative practice and supporting teachers and leaders in this work. Her PhD research focused on teacher induction, mentoring and coaching programs and their systemic change implications.

## Educator's Recess: Building Connections and Your Toolbox!

Location : CRX 020 (11:15-12:15 PM & 2:30-3:30 PM)

Who ever said recess is only for kids? If you classify yourself as an adult; by your age, maturity, or life responsibilities we hope you will join us for our Educator's Recess. It is a chance to stop adulting for 60 minutes and connect with our youthful selves. Come prepared with an open mind, sense of humor, and just enough curiosity to step outside your comfort zone. You may even walk away with sustainable strategies for integrating play in the classroom to make learning more fun for your students and yourself.

### About Jess Amato

*Jess Amato, a nationally certified recreational therapist and community developer, is the founder of Platform to Play, with a mission to create awareness, autonomy, and explicit opportunity for play for all. Jess and her team provides professional learning and development and program development to schools domestically and internationally. Through the philosophy of recreational therapy, Platform to Play fosters inclusion and guides individuals and communities in achieving their highest potential.*

## Playing with Play: Considerations for Embedding Outdoor, Play-based Learning

Location : University Square OR CRX 220 (11:15-12:15 PM & 2:30-3:30 PM)

This workshop invites educators to "play with play" through gaining a better understanding of outdoor, play-based learning through exploring:

- What's possible (a look at the research and our 'why')
- A new working definition of play-based learning that involves a continuum of experiences for children and educators
- How this approach fits into an interwoven theoretical landscape
- Educator mindset, habits and practices (also referred to as pedagogical framing, dispositions and interactions)
- A special nod to involving children in balancing and managing risks

### About Marnie Power

*Marnie Power is renowned for her work in outdoor, play-based learning after a decade of working alongside educators supporting the Forest and Nature School field in Canada. She has served in senior leadership roles, including as Executive Director of the Child and Nature Alliance of Canada, as founder of Forest School Canada, and as a former steering committee member of Outdoor Play Canada. In 2020, she received the inaugural Child and Nature Fellowship hosted by Community Knowledge Exchange (CKx) and is now leading a new not for profit organization called Playful Mindset. Her work reflects a deep commitment to anti-oppressive practice and exploring how outdoor play and social practice are intertwined, a focus that reflects her early career in social work. She is currently completing a Master's degree in Education at Trent University, where she explores the intersections of play-based learning, the outdoors, self-agency, and how pedagogy translates into practice for educators.*

# Workshops

## Je veux enseigner les perspectives autochtones, mais comment faire ?

Location : CRX 323 (11:15-12:15 PM & 2:30-3:30 PM)

La plupart des membres du personnel enseignant s'entendent aujourd'hui pour dire qu'il faut inclure les perspectives et les façons de faire des peuples autochtones dans son enseignement. Mais comment faire quand on n'est pas autochtone? Dans cet atelier interactif, Hélène présentera des outils et des grands principes permettant d'enseigner les perspectives autochtones de façon respectueuse. Le concept de l'humilité culturelle sera expliqué, pour ensuite discuter des protocoles à respecter lors de l'accueil d'une aînée ou aîné, d'une gardienne ou gardien du savoir. L'atelier se terminera avec des exemples concrets de collaboration entre l'école et la collectivité autochtone locale. Une période de questions permettra aux personnes participantes d'approfondir leurs connaissances.

### About Hélène Devarennnes

*Hélène Devarennnes* est chargée de cours à l'Université de Moncton et consultante en éducation et en relations avec les peuples Wabanaki, les peuples autochtones des territoires partagés du Nouveau-Brunswick, de la Nouvelle-Écosse, de l'Île-du-Prince-Édouard, de Terre-Neuve et de la Gaspésie. Elle a mené les négociations et l'élaboration de plans stratégiques pour les 7 ententes d'amélioration des services éducatifs des jeunes Wabanaki fréquentant les écoles francophones du Nouveau-Brunswick. Elle a aussi mené plusieurs initiatives pédagogiques, à l'échelle locale comme à l'échelle nationale, visant le développement de ressources pour la littératie en milieu autochtone et pour la formation de personnes allochtones. Ces dernières ressources mettent en lumière la voix des survivants des pensionnats, des aînés, des gardiens de savoirs et des experts autochtones en éducation, et des responsabilités des personnes allochtones. Hélène détient une maîtrise en études de l'environnement et un doctorat en éducation en milieu autochtone. Elle est aussi l'autrice de plusieurs albums jeunesse, dont deux livres en collaboration avec des aînés Wabanaki.

## Playing with Play Doh to do good in the world through Design Thinking.

Location : CRX 307 (11:15-12:15 PM & 2:30-3:30 PM)

The love to play with problems in a thoughtful way will help our students navigate the challenges and opportunities of the 4th Industrial Revolution. Experience how middle school students use Play Doh and careful group work with the Design Thinking Process to do good in the world. Students learn that their play can have real impact on people living in light poverty.

### About Ian Fogerty

For 25 years, *Ian* has been innovating in his science classroom. Ian is interested in how technology can be used to develop the Global Competencies. His class was the first in the world to have more than one Smartboard in a single room, which allowed students to play and develop communication, creativity, collaboration and critical thinking. Ian's father said, "Teach kids; not curriculum." so Ian plays with transdisciplinary projects that sometimes looks more like a k-2 class than a high school because they help students discover "how they are smart". His work won the Prime Minister's Award (Ottawa), a top 3 in the world for Communication and Collaboration (Cape Town), top 10 in the world for Sustainability in Education (LA), Global Teacher Top 50 (Dubai), top 100 for Innovation in Education (Helsinki), mentioned from the floor of the UN and the first Canadian to win the NSTA STEM Educator award.

## Lights across these Lands: A Network in Paper Circuits

Location : EdStudiO LMX 203 (11:15-12:15 PM)

During this hands-on workshop, participants will build a personal paper circuit of meaning, and then contribute to the making of a "Lights Across These Lands" map of the Canadian Playful Schools Network that will hang in the newly built EdStudiO at the uOttawa Faculty of Education. Simple but playful and interdisciplinary, paper circuit activities invite students to create stories with light, while applying foundational understandings of electrical circuits. Participants will also learn about the design of the EdStudiO teaching, research and community space, funded in part by the LEGO Foundation through the Canadian Playful Schools Network project.

### About Michelle Shira Hagerman & Rick Alexanderson

*Michelle Schira Hagerman* is Associate Professor of Educational Technologies, CPSN Researcher and Director, EdStudiO. Through her research, and in her practice, she seeks to understand how teachers can use digital technologies to support student learning, especially through creative inquiry projects that leverage both digital and physical materials and tools.

*Rick Alexanderson* OCT is a technology specialist who has taught with the Ottawa Catholic School Board for over twenty years. In addition to teaching, Rick has developed a community curriculum for the use of Robotics in the classroom, is Coordinator of the CodeMyRobot.ca initiative, and spent five years as resident maker at the Ottawa Maker Space North community. Rick continues his community support by acting as co-coordinator of the Ottawa Maker Festival and has provided important and generous consultation on the development of EdStudiO.

## Systematizing Experiential Play-Based Learning

Location : CRX 323 (11:15-12:15 PM)

Saskatchewan Rivers Public School Division is located in Prince Albert, SK which is nestled in Treaty 6 Territory in beautiful Northern Saskatchewan. Our school division is a mix of urban and rural schools with over 50% of the student population being self-declared as Indigenous. Over the last few years, SRPSD has committed to the process of implementing experiential, play-based learning throughout our PreK-8 classrooms. As part of this journey, we have designed and implemented an EPBL model to support the systematization of this pedagogy. This work directly connects to the heart of Indigenous Worldview. In this workshop, we will describe our Experiential Play-Based Learning story for you; sharing our model, resources and experiences that have helped us along the way.

### About Jennifer Hingley, Theresa Thorsen & Kami Karakochuk

*Jennifer* is a graduate of the Saskatchewan Urban Native Teacher Education Program (SUNTEP) through the University of Saskatchewan which provides a strong emphasis on Métis history and social justice. She also completed her M.Ed in Curriculum and Pedagogy through the U of S. Jennifer has been in education for 28 years as a teacher, consultant, principal and superintendent.

*Theresa* has been in education for 19 years as a classroom teacher (gr.1-8), vice-principal and Indigenous Perspectives Coach and Consultant. She is also a graduate of SUNTEP and received her M.Ed through the Critical Environment Education cohort at the University of Saskatchewan.

*Kami* has been in education for 18 years as a classroom teacher (PreK-grade 6) and an Early Learning Coach. She has a B.Ed through the University of Regina, an M.Ed through the University of Alberta and her certificate in Relational Therapeutic Play through the Canadian Association of Play Therapy.

# Workshops

## Au gré des saisons !

**Location : University Square OR CRX 320 (11:15-12:15 PM & 2:30-3:30 PM)**

Cet atelier est destiné aux participant.e.s qui souhaitent profiter de la curiosité naturelle des élèves dans leurs pratiques pédagogiques. À l'aide de la ressource *Curiosité naturelle*, les enseignant.e.s se familiariseront avec les 4 volets du cadre pédagogique et les perspectives autochtones qui y sont associées et orientée vers une relation de réciprocité avec la terre. De plus, vous aurez la chance de débiter une planification réflexive au gré des saisons. Veuillez noter que les participant.e.s devront prévoir des vêtements adaptés à la météo puisque l'atelier se déroulera à l'extérieur.

## About Chantal Larivière

*M'identifiant comme allochtone, je reconnais que je suis une invitée sur cette terre et qu'il existe de multiples communautés autochtones sur l'île de la Tortue et je respecte leurs protocoles culturels et leurs traditions. Cette démarche durera toute ma vie et sera enracinée dans mes actions quotidiennes. Au cours de mes 26 dernières années Conseil des écoles publiques de l'Est de l'Ontario, j'ai enseigné au cycle préparatoire, au cycle primaire, et tout récemment accompagnatrice pédagogique. De 2013 à 2015, j'ai participé au projet ministériel afin d'approfondir mes pratiques pour la mise en œuvre de l'apprentissage par l'enquête dans ma salle de classe. Aussi, j'ai participé à l'élaboration de plusieurs ressources sur l'enquête en autre *Curiosité naturelle*, édition 1 et 2. Lors de mon passage en Italie en mars 2018, j'ai participé à une semaine d'étude afin d'approfondir mes connaissances sur les principes de Reggio Emilia. Finalement, j'ai joint l'organisme Child and Nature Alliance of Canada pour offrir des formations afin de réfléchir à l'importance du jeu et recréer un lien avec la nature tant pour les enfants que les adultes.*

## Let's do our :bit with micro:bit!

**Location : CRX 307 (11:15-12:15 PM & 2:30-3:30 PM)**

In this session, we will introduce attendees to the micro:bit and some of the basic projects in the classroom. A micro:bit is a great introductory physical computing device to allow for a combination of coding and building. Attendees are encouraged to bring their computers (with USB connections) and enthusiasm to come and explore with micro:bits.

## About Andrew McDonald & Cynthia McNelles

*Cynthia is a grade 7 and 8 math and science teacher at the Ottawa Catholic School Board. She is a micro:bit champion and uses coding and micro:bits in her classroom for purposeful learning. As a teacher, she feels that micro:bits are a great support in designing and implementing lessons aligned with academic standards. She is passionate in current pedagogical trends such as: The 6C's, Deep Learning and Project Based Learning.*

*Andrew McDonald is an educator within the Ottawa Gatineau region excited to get folks creating in and outside the classroom. Trained as a science/math teacher, he enjoys supporting students and teachers alike with their various maker-based projects. His current passion is creating and playing with micro:bits. Cynthia and Andrew are both micro:bit Champions and are here to support all your micro:bit projects.*

# Workshops

## Take Apart ! / On démonte !

Location : CRX 308 (11:15-12:15 PM in English & 2:30-3:30 PM in French)

If you ever wondered how many pieces are in a phone or other type of device, this workshop is perfect for you. Put on your safety goggles, pick up some tools, and take something apart! Have a look at what's under the hood of phone, printer, toaster, or other small device or appliance. Next, you'll be challenged to take your disassembled mess and arrange the pieces in an artistic fashion, inspired by Todd McLellan's "Things Come Apart" project.

Vous êtes-vous déjà demandé combien de pièces on trouve dans un téléphone ou autre appareil? Lunettes de sécurité sur le nez, choisissez vos outils et commencez à démonter! Découvrez ce qui se cache dans un téléphone, une imprimante, un grille-pain ou d'autres appareils. Vous serez ensuite invités à disposer votre amas de pièces détachées de façon artistique en vous inspirant du projet « Things Come Apart » de Todd McLellan.

## About Catherine Émond

*My first real job as a young adult was in a museum, a monastery to be exact. I loved it so much that for the last 15 years, I've continued to work cultural institutions, surrounded by collection that span the last millennia. I discovered a passion for informal learning, particularly about the maker movement. I currently work as an Experiential Learning Officer at Canada Science and Technology Museum. I coordinate our makerspace, Exploratek, which I developed from the ground up, and invite the public to try a variety of creative challenges. I am motivated by the inspiring creations of visitors, by experimenting with new projects and by discovering new ways to share them with the public. I'm also a PhD candidate, studying how we can ensure makerspace are more accessible and inclusive for kids that might be in disabling situations.*

*Mon premier vrai travail de jeune adulte s'est déroulé dans un musée, un monastère pour être exact. J'ai tellement aimé cela que depuis 15 ans, je continue à travailler dans des institutions culturelles, entourée de collections qui couvrent les derniers millénaires. Je me suis découvert une passion pour l'apprentissage informel, en particulier pour le mouvement des créateurs. Je travaille actuellement comme responsable de l'apprentissage expérientiel au Musée des sciences et de la technologie du Canada. Je coordonne notre espace de fabrication, Exploratek, que j'ai développé de A à Z, et j'invite le public à relever divers défis créatifs. Je suis motivée par les créations inspirantes des visiteurs, par l'expérimentation de nouveaux projets et par la découverte de nouvelles façons de les partager avec le public. Je suis également candidate au doctorat et j'étudie les moyens de rendre les makerspaces plus accessibles et plus inclusifs pour les enfants susceptibles d'être en situation de handicap.*

## Take it Outside documentary & the use of Plant Music in classrooms

Location : CRX 324 (2:30-3:30 PM)

Chat about the Take it Outside documentary and learn how to bring plant music to your classroom.

## About Susannah Heath-Eves & Shane Mendonsa

*Susannah Heath-Eves is a documentary filmmaker based in Ottawa who focuses on social justice and connection to nature. Her debut film, JUGAAD, was acquired by Netflix and CBC's Documentary Channel. She has made several short docs for CBC Arts, and was a Production Supervisor and Co-Editor at the renowned Montreal production company EyeSteelFilm. Susannah has reported and associate produced for CTV and CBC Radio and Television, and she is a masters graduate from Carleton University's School of Journalism.*

*Shane Mendonsa is a plant music artist and composer with more than a decade of experience in award winning independent films, documentaries, Bollywood movies and electronic music production over all major platforms and avenues. He aims to work collaboratively with all forms of life and nature through music. His goal is to contribute to a more fair, equal and sustainable world.*
